

Write a JavaScript program to find the length of a string without using predefined methods and use for loop, for-in loop, and for-of loop.

for-of loop:

```
var str = "nandiswar";
var count=0;
for(let i of str)
{
    count++;
}
console.log("length of given string is : " + count)
```

o/p:

length of given string is : 9

for-in loop:

```
var str = "nandiswar";
var count=0;
for(let i in str)
{
    count++;
}
console.log("length of given string is : " + count)
```

o/p:

length of given string is : 9

for loop:

using for loop still trying
